

# Delta-3 Radios

This popular line has been the standard of the garage door opener industry for years. Mix and match any Delta 3 transmitter with any Delta 3 receiver. Each unit is easy to program or reprogram, thanks to a very accessible, eight-position, digital coding switch with 256 possible combinations.

**1-Channel DT Transmitter:**  
Activates one Delta 3 receiver.

**2-Channel DT2A Transmitter:**  
Activates two Delta 3 receivers independently.

**4-Channel DT3+1 Transmitter:**  
Activates one DRG gate receiver and up to three separate Delta 3 receivers.

**4-Channel DT4B Transmitter:**  
Activates four separate Delta 3 receivers. Can also be used as remote UP, DOWN, and STOP control for commercial operators.

**1-Channel Mini Transmitter:** Keychain style transmitter. Activates one Delta 3 receiver.

**Multi-Channel DTKP Wireless Keypad:**  
Activates multiple Delta 3 receivers. User selects 1 to 8 digit PIN number.

**1-Channel DGT Transmitter:** Safety edge transmitter. Activates one Delta 3 receiver for remote stop or reverse safety edge. No cables or coiled wires.

**1-Channel DR Receiver:**  
Activates one device.

**2-Channel DR2 Receiver:**  
Activates two devices.

**4-Channel DR4 Receiver:**  
Activates four devices or UP, DOWN, STOP COMMERCIAL.

**1-Channel DRG Receiver:** For use with any Delta 3 transmitter. DRG receiver activates one gate operator for access control applications. Supplied with F-connector and antenna, plus three feet of coaxial cable.

**2-Channel DRG2 Receiver:** For use with any Delta 3 transmitter, DRG2 receiver is also for access control applications. Ideal for combining with DGT safety edge transmitter for obstacle sensing and control of one gate or commercial door. Supplied with F-connector and antenna, plus three feet of coaxial cable.
