

MegaCode Radios

Any remote chance of code duplication is all but eliminated by Linear's MegaCode format controls with over 1,000,000 available codes. Mix and match any MegaCode transmitter with any MegaCode receiver. Installers have no dip switches to set — MegaCode receivers auto-learn transmitter codes.

1-Channel MDT Transmitter: Activates one MegaCode receiver. Extra top button. LED and positive tactile feedback verify operation. Car visor mounting.

2 or 3-Channel MDT-2

Transmitter: Activates two MegaCode receivers. Top button activates a third. LED and positive tactile feedback verify operation. Car visor mounting.

4 or 5-Channel MDT-4

Transmitter: Activates four MegaCode receivers. Top button activates a fifth. LED and positive tactile feedback verify operation. Car visor mounting.

1-Channel MMT-1 Transmitter: Activates one MegaCode receiver. Snap-action keychain included.

2-Channel MMT-2 Transmitter: Activates two MegaCode receivers. Snap-action keychain included.

1-Channel MGT Transmitter: Safety edge transmitter. Activates one MegaCode receiver for stop or reverse safety. No cables or coiled wires.

Multi-Channel MDTK Wireless Keypad: For activating multiple MegaCode receivers. User selects 1 to 6 digit PIN number or 1 to 6 letter PIN name.

Programming is easy via the keypad; MegaCode receiver auto-learns PIN.

1-Channel MDR Receiver: Activates one MegaCode device. Stores up to 10 transmitter codes.

2-Channel MDR-2 Receiver: Activates two devices. Stores up to 10 transmitter codes.

1-Channel MDRG Receiver: Activates one gate or commercial receiver. Stores up to 40 transmitter codes. Supplied with F-connector and antenna.
