

MULTI-CODE TRANSMITTERS

MODEL 3089: SINGLE-CHANNEL TRANSMITTER

With 1024 codes, and fully compatible with our existing receivers and transmitters, this transmitter provides maximum security for your customers. Stylish neutral gray color matches any color combination and reduces your transmitter inventory. Built-in LED light indicates battery strength.

Specifications:

Power	Standard 9 volt Eveready* 216
Dimensions	3-3/4 x 2-1/2 x 7/8"
Codes	One set of 1024 codes

MODEL 4120: TWO-CHANNEL TRANSMITTER

The 4120 combines stylish design with functionality. The ideal answer to your two channel needs, the 4120 is able to operate your gate and garage door, two independent garage doors, etc., in one compact unit. With 1024 codes on each channel, the 4120 is fully compatible with our existing receivers and transmitters. And two complete, 10-position DIP switches allow fully independent operation on both channels.

Specifications:

Power	Standard 9 volt Eveready* 216
Dimensions	3-3/4 x 2-1/2 x 7/8"
Codes	1024 per channel

MODEL 4140: FOUR-CHANNEL TRANSMITTER

Offers complete control of up to four separate operations in one convenient transmitter. Is ideal for situations like common gates with individual garages, etc. The 4140 four-button transmitter has two independent sets of DIP switches that provide up to 512 codes for each DIP switch. Designed to be fully compatible with all Multi-Code receivers...simply set the first nine switches in common with your receivers, making sure that the tenth position on each of the transmitter switches is in the "off" position.

Specifications:

Power	Standard 9 volt Eveready* 216
Dimensions	3-3/4 x 2-1/2 x 7/8"
Codes	Two sets of 512 codes

All models feature two-piece design for easy access to battery and switches.
